

## Advanced Vibration Shaker Testing

Wednesday September 14<sup>th</sup> 2022

Link Hotel, Loughborough, LE11 4EX

Introduced by NDO Consultants Ltd. in association with Data Physics UK Ltd

This seminar is aimed at previous attendees of our basic course who want to understand more about the complex control modes in addition to experienced shaker testing engineers who want to start using and understanding modes such as Mixed mode, SRS, Time Replication and combined environments.

This is also very applicable to managers and other engineers who do not necessarily carry out these tests but may be involved in their specification or the subcontracting of their completion.

We will be covering:

- Mixed Mode, Sine on Random, Random on Random and Sine on Random on Random.
- Time Replication
- Kurtosis
- SRS Shock testing (Shock Response Spectra)
- How to rate a test system for these advanced test modes
- Combined modes (vibration and temperature/humidity)
- Practical demonstrations

We have gathered together subject specialists and engineers of many years test experience, from a range of testing backgrounds.

Course fees include lunch, refreshments and full course notes the seminar cost will be £175 per delegate. The places are limited so please book early by completing and sending the attached booking form along with your payment or order number to [info@ndoconsultants.com](mailto:info@ndoconsultants.com)
